Subject: Microsoft Settlement

To whom it may concern,

I urge you to make the terms of the Microsoft antitrust settlement broader than the proposed settlement, which I believe doesn't serve the public interest in its current form. The currently proposed settlement uses language which leaves gaping holes where predatory practices could continue to be used against competitors, simply because they compete against products that weren't specified in the settlement. The public interest would best be served by Microsoft agreeing to abandon all of its predatory practices, not just those mentioned in the proposed settlement, as well as abandoning its predatory practices against all competitors, not just those who compete with the Microsoft products mentioned in the proposed settlement.

Thank you,

Daniel E. Jacobs
